

RUDRA SAMADHIYA

Full-Stack Developer • React • Next.js • React Native • Node/NestJS

Bhopal, MP, India • +91 86430 37131 • samadhiyarudra123@gmail.com

[LinkedIn](#) • [GitHub](#) • [LeetCode](#) • [Portfolio](#) • [prepsharp.in](#)

EDUCATION

Indian Institute of Information Technology (IIIT), Bhopal

2025 – 2029

B.Tech, Computer Science & Engineering (Data Science) • CGPA: 8.6 / 10 • A+ in all core CSE subjects

The Sanskaar Valley School, Bhopal

CBSE • 2024

TECHNICAL SKILLS

Languages: TypeScript, JavaScript, Java, C++

Frontend: React, Next.js, React Native (Expo), Tailwind CSS, HTML/CSS

Backend: Node.js, NestJS, REST APIs, Socket.IO, JWT / OAuth authentication

Databases: PostgreSQL, MongoDB, Firebase / Firestore, Redis

DevOps & Tools: Git & GitHub, Docker, Vercel, Firebase Hosting, EAS, GitHub Actions CI, Postman

CS Fundamentals: Data Structures & Algorithms, OOP, Operating Systems, DBMS

PROJECTS

PrepSharp — JEE Exam-Prep Platform

React • Next.js • React Native • Firebase

[Live: prepsharp.in](#) • [Google Play](#)

- Designed and launched a full computer-based testing (CBT) platform simulating JEE Main & Advanced, with a 133,000+ question bank across 241 full-length papers, real-time scoring, and detailed answer review.
- Shipped a React Native (Expo) Android app to the Google Play Store and a live Next.js web app on a shared Firestore backend.
- Built an automated PDF-to-question extraction pipeline (chapter, difficulty, answer-type metadata), KaTeX math rendering, and per-student analytics for accuracy, timing, and weak-chapter detection.

Instant Kirana — Distributed Quick-Commerce Platform

React Native • NestJS • PostgreSQL • MongoDB • Redis

- Architected a Blinkit-style grocery-delivery system with separate customer, store-owner, and delivery-partner React Native apps plus a web admin dashboard, backed by NestJS microservices.
- Implemented real-time order and delivery tracking over Socket.IO with reconnect and REST-polling fallback, a multi-layer Redis/edge caching stack, weighted MongoDB search, and Razorpay payments.

Multi-Store POS System

Java • OOP • PostgreSQL

- Built a point-of-sale and inventory system in pure object-oriented Java with a transactional billing engine that never oversells stock, salted password hashing, pluggable CSV/PostgreSQL persistence, a test suite, and GitHub Actions CI.

FlowLink — Knowledge & Workflow Platform (Hackathon)

React • Firebase

- Built at HackAxios with Team DRONA: role-based access control and a create → moderate → approve → vote workflow with duplicate detection and automatic escalation.

ACHIEVEMENTS & ACTIVITIES

- Open Source — GSSoC 2026:** 16+ merged pull requests across community projects (Power Contributor).
- 2nd Place — RootRush 2026 CTF** (Jeopardy-style), Xploit Cybersecurity Club, IIIT Bhopal — led team Ctrl Alt Defend across forensics, security-analysis, and AI challenges.
- Data Structures & Algorithms:** solving problems on LeetCode across arrays, strings, hashing, trees, and dynamic programming.
